## Part: 1

### Associating with the companies that you will place ads for:

You will be joining one or several companies that will provide products that you can place ads for. These are the companies that will be paying you. There are many such catalogs with good products to place ads for. We will show you several. We suggest that you sign up for at least 2 of them. Each company is completely free to join and you don't have to buy anything from them.

The first company you can join that will pay you is Paydotcom.com. Paydotcom.com provides sites such as the one you joined, Adwritingjobs.com. They also have other product sites that you can place ads for. You will make a lot of money promoting sites that sell memberships. They are also known as E-books like the one you are currently reading. A customer pays and gets access to the e-book. You in turn make money when the customer purchases after clicking on the link that you inserted in your ad. We will also show you other companies you can join that sell tangible goods such as dvd's, books, software, and much more. For now though we will first get you signed up with our company which provides e-books (which sell incredibly well), and then we will get you signed up for a second site which also offers over 10 000 different e-books and some tangible products. After that if you wish, you will be able to sign up for another huge catalog of all sorts of tangible products and e-books that you can place ads for.

Click on the following link and join. [www.paydotcom.com](http://www.paydotcom.com) . The website should open in a new window. If the window does not open, just open another internet explorer window and type [www.paydotcom.com](http://www.paydotcom.com) in the address bar. You then click on the **Click here to Sign Up** button on the paydotcom.com site. You then enter your Name, address, phone number, and other information. For the company name you can just write your own name. For the website part you can just write [www.yourname.com](http://www.yourname.com) . You can also choose to be paid by Paypal. If you don't have a Paypal account just visit [www.paypal.com](http://www.paypal.com) and sign up. It is completely free. Paydotcom.com will send you your payment by Paypal which you can then deposit automatically into your bank account through bank transfer.

Ok, now that you have joined paydotcom.com, you need to login to your account with the username and password you just chose to create your account. In there you will see Your Affiliate Links; you choose the product you want to promote. You will then click on **Display Links**, it will be marked "Text Links". Click on Text Links. Your link should look something like this

<https://paydotcom.com/r/56519/bhuva/19053955>

Ok, now we will show you the other catalog of over 10 000 companies.

[Click here to sign up for your free Clickbank account.](#)

Clickbank has over 10 000 companies you can associate with.

After filling in all your personal information you will come to a page like that asks you to confirm your account, keep that page open. After you fill in your personal information clickbank will send you an email to the email addresses you signed up to clickbank for. Inside that email you must get your confirmation code and type it into the confirmation code box. You then enter text from the image and then you click finish. Your account is now open. In the event that you don't receive the confirmation code by email. Please refer to this guide. The confirmation code is sent from the email address [notify@clickbank.com](mailto:notify@clickbank.com). If you do not receive the confirmation code, it may mean your email account is blocking our messages. If you do not find our message in a spam filter, you will need to contact your ISP or use an alternative email address when signing up. If you have no alternative email address, our best suggestion is to sign up for an account with hotmail.com, yahoo.com, or any other free, web-based email host.

Once you have joined Clickbank you will have an array of different company's products to promote. These companies are in need for you to place ads for them so that you will market the services they offer, you in turn will make profits. You do not need to do any selling, because these websites will handle all the orders, selling, and split the profits with you. All you have to do is place ads telling other people about your Clickbank products. These companies pay up to 75% commission on all sales you generate for them.

You can choose from thousands of companies in this [incredible catalog](#).

Register with the companies in this directory you would like to place ads for. It does not cost any money to sign up as an affiliate for these companies, when you place ads for other company's products you become their affiliate. Which is what you will be, an affiliate. You don't have to buy anything else or carry any products of your own or make any phone calls. You don't even have to contact the company before starting to place ads about their products. They expect people to do this, and they want people to do this.

Now that you are signed up with Clickbank it is time to pick which companies to work with. [Browse the catalog](#) and choose which companies you would like to work with. You are not obligated to purchase anything from any of these companies. Here is what you want to do. You want to pick some of the best performers in categories like Money and Employment or Home Business. They Work well, you can also choose from other categories that interest you. Once you are at the [Clickbank Marketplace](#). You will see a list of companies after having chosen a category. It will be marked Create Hoplink underneath that company's listing.

You will click on Create Hoplink. It will then be written,

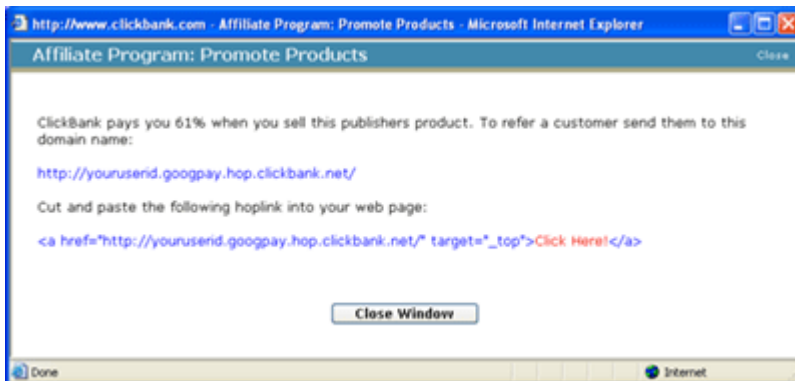

You can earn 61% (or whatever percentage for the product you chose) for each paying customer you refer to this product. For details please enter your ClickBank nickname and tracking ID (if you have one, the tracking id is not necessary to place ads, you can skip that part for now): You don't need a tracking id, so don't worry about that. You then enter your Clickbank nickname into the box that appears ( that is the username Clickbank sent you when you opened your account with them.) And then you click Submit. It will then give you this message:

ClickBank pays you 61% when you sell this publishers product. To refer a customer send them to this domain name:

<http://YOURUSERID.googpay.hop.clickbank.net/>

Your own user id will be marked instead of Youruserid. This is just an example. For example: if the username you chose was helen4499, then your hoplink will look like this: <http://helen4499.googpay.hop.clickbank.net/>

Your hoplink is the link you want to include in all your ads. Once you have your hoplink for a company you want to promote, you then place that hoplink in your ads.

Replace the Youruserid in the internet address <http://YOURUSERID.googpay.hop.clickbank.net/> with your ClickBank ID. That is how you will create your ads, each ad will have a hoplink. By replacing the YOURUSERID with your clickbank username, Clickbank will know that the sale is coming from you so that they can deposit money into your Clickbank account.

Here is another Catalog of companies you can place ads for, this company has a lot of products (tangible products too like software, books and much more that you can place ads for.

[Click2sell.com](http://Click2sell.com) - Another great company that has many products that you can place ads for.

After you have completed this section by signing up for atleast 1 of the 4 companies we mentioned, you can proceed to the next section of the Member's area.

## 2. How to place your ads.

Classified ads are one of the best ways to make money on the internet. There are so many new and improved classified ad sites out there that your chances of making lots of money are very high, we will give you a huge list of the best classified ad sites around the world. Expert ad-placers like myself place classifieds in as many sites as possible. We will also be showing you how to place 2 other types of ads in Part. 4

In this section we will place a classified ad together on Usfreeads.com. Once you have your account with them you can place free ads or paid ads. You can open a free account, a gold account or a premium account. We suggest that you open a Premium account, because with a premium account there is no limit to the number of ads you can place. A premium account costs \$9.99 a month, which isn't very much considered the amounts of money you can make per month with your classifieds. With a Gold account you can only type 25 ads and have 25 ads running at one time.

With a premium account you can have hundreds. Usfreeads also has what they call Feature ads, these ads go at the top of the category you choose. A featured ad costs around \$40 to \$50. Featured ads are a great way to get lots of people to click on your ad and visit your product website. We **highly recommend** that you place some featured ads as well as, as many premium ads as you can type.

Please note that if you place a featured classified on say Usfreeads.com, you should also add a redirect to your product website in your ad. This costs \$3 extra but it is well worth it, you will see this option when you Feature your ad. You should also choose the maximum number of months available for your ad length. This will ensure your ad goes above all the others. The ad on our homepage that shows you an ad we placed and earned over \$400 with is an ad we placed on Usfreeads.com for about \$40. You need to follow what we just said to duplicate our results. What you have just read in the last few paragraphs is the secret formula for typing ads. You want to place free and paid ads. Typing only free ads will earn you money, but not as much as if you were to do both. Our favorite categories in Usfreeads are Work at home-Data Entry, Work at Home-Home Business, Work at Home-Ad Typists, Work at Home-Affiliate Marketing. There are other good categories too. The key is to place your ads where people will see them more. Please also note that each time you place an additional Featured ad, you will be given a 10% discount, if you order a second featured ad you get a 20% discount, 30% discount on a third, etc..

Ok, so now we will place a classified together, this ad is just an example to give you an idea as to how many classified ad sites work.

First you go to [www.usfreeads.com](http://www.usfreeads.com) and you login to your account. You then click on Place Ad at their site. Your next step is to choose a category for your ad. For this classified we will choose Business Opportunities. You click on that.

✖ Select a sub-category from the list on the left

Tip: If you've selected the wrong parent category, you can change it by clicking the  symbol.

For this ad we will choose Ad Typists as the second sub-category. Please note that not all classified ad sites have this many category options. The good part about Usfreeads is that there are several sub-categories which means you can place multiple ads in several different business opportunity categories. After clicking on Ad Typists You will click on the second option where it says click here to place your ad without setting it to run in a personal category.

[Click here](#) to place your ad without setting it to run in a personal category (you can add personal categories later if you wish).

Next you will click on Regular classified with text and images.

#### **Regular classified with text & images**

This option allows you to type a regular classified ad and upload images. This is the recommended option for novice users or if you just want to post a quick classified without any enhanced text formatting. You can still specify shipping details, add a PayPal payment button, link to a website, upload up to 12 images etc, and is well suited for all items.

Now you will type your ad, type your title, description, price and your product link. For the price we have written nothing, many ad typers leave the price part with nothing in it. When people visit your ad they will see the price anyways, if you want to add the price that is up to you. You don't need to fill in the other boxes that are in the ad setup, the ones filled out below are the only ones you need to fill out.

### Place Ad Step 3 (type your ad)

**Business Opportunities > Work at Home > Ad Typists** [change category](#)

If the above is not the most relevant category for your ad or if you made a mistake and would like to change category, please [click here](#) to go back to the category selection page.

Please note that if our terms and conditions are violated by deliberately placing your ad in an inappropriate category, your account will be deleted.

<b>Ad Title:</b>	<input type="text" value="Ad Typists Needed! Work from home, Great Income!"/>
	<b>Tip:</b> Concise, descriptive, accurate titles attract more clicks

<b>Price:</b>	<input type="text" value=""/>
	<b>Tip:</b> Leave the price as 0 if you need the price to read as "unspecified" on your ad

<b>Description:</b>	<input type="text" value="Excellent opportunity to earn a great income from home working only 1 to 2 hours a day. Our Ad Typists get paid every 2 weeks, on time every time. The amount of money you can earn with this home based job is limitless. Visit our website at http://www.affiliatecashpayouts.com/232-3.html"/>
	Your description should accurately describe the item/product/service that you're advertising. The more information you provide, the better your chances are at generating inquiries.
	<b>Tip:</b> Ads typed in all CAPITAL LETTERS look spammy, are hard to read, and get less responses than others.

<b>Link:</b>	<input type="text" value="http://www.affiliatecashpayouts.com/232-3.html"/>
	If you have a website you'd like to link to from your ad, enter the address above.

Next it will show you a preview of your ad, you now click on Save Ad, if you need to edit your ad, you can do that after.

## Place Ad Step 4 (preview)

Below is a preview of the ad details that you are submitting.

If you need to make any changes, please click the 'back' button on your browser otherwise click 'save below'.

Save this ad

Now we will add an image to your classified ad. Classifieds that have an image with them are clicked on much more than ads that don't have one. We suggest you always put an image with your classifieds. If you don't have any images to put with your classifieds, just go to [www.google.com](http://www.google.com) and click on Image search on the top left. Now you will type money, or home business, in the search field and click submit. A bunch of images will appear, you can now save them to your computer. Right click over the image you want and click on Save Picture As. The image will then be saved to your computer, you can save it to My Documents or My Pictures either is fine. Now you will click on Upload Images in the ad options section.

## Part 2. In depth examples of ads you can place.

Here are some ads that we have created to serve as a **guide for the ads that you will place**, if you want to you can copy and paste these ads into the ad sites, we don't mind. We specialize in business opportunity ads, however there are several categories of interest for which you can place ads. In Clickbank there are products about fixing your Car to burn less gasoline. Products about Advertising in General. Software products, health based e-books such as weight loss guides written by professionals. There are all kinds of ads you can place to earn you money.

There are certain words that you should place in ads that will help you get more sales with your ads.

In your titles you should use words that call to action, such as Act Now, or Urgent. Mentioning that your product produces results fast, include these types of words in your ads. You should also include lots of adjectives, excellent, powerful, fast, great, and others.

Your ad has to stand out from the others. Lots of good ad-placers even use Racy language to get people to click on their ads, for example: Your ad could say I am rich and you are poor, click here to see how you can change that fact.

Or an ad could say, Most people are Lazy, Why don't you be Active and click on my ad right now, it will make you a better individual, our product ensures that fact.

Those are the types of phrases that will get people to look at your ad and click on your product link. You want them to click on that link of yours.

Here are some sample prewritten ads to get you started. The best way to create good ads is to go on the classified or pay for placement sites and copy and paste ads that people have already written into a text file such as Word or Notepad, you then modify the ad to fit the site you are promoting.

Now that you have a good idea on how to place ads, you should proceed to the **next step**:

### **Part 3. List of the places where you will place ads.**

Here are some of the best places where you can place ads, we suggest you place ads on as many sites as you can. The more ads you place the more money you will make.

In many of these classified sites your ad will be seen and clicked on by more people when you pay a small fee, we recommend you pay these small fees because your ad will be clicked on by more people this way. However we also recommend that you place free ads as much as possible also.

Classified ad sites:

[Usfreeads](#) This is one of the most popular classified ad sites. You can place as many ads as you want when you are a premium member. #### Part 4. Placing ads on other people's websites.

Placing ads on other people's websites is a great way to place ads. Very often you can negotiate great deals with webmasters. Here is what you do to place ads on other people's websites.

First you do a search on Google for the type of website you want to place ads on. As an example: we will do a search for Work at Home on Google.com. After doing the search we find listings of websites related to working from home. You visit the first site that comes up and the other 9 listings too if you want. We'll start with the first website to come up. You click on their site and then you find that website's contact email. You write an email to them and you tell them that you are interested in advertising on their website.

You ask them in the email for their pricing for place a text link, or a banner link, you can ask for the price of both. What you want to do is place ads on websites that are popular. Usually when a website is number 1 on google for a popular search term like Work at Home you know that that website has a lot of people who visit it.

That is what we want, we want to advertise on popular websites. In your email that you write to them you also ask them how long your ads will run. Later on down this page we will write the email for you, you can then just copy and paste it and send it to owners of websites.

Experienced ad-placers place ads where they will get clicked on. That is the key factor in making the most money. You want traffic to your ads. Ads on popular websites can sometimes be expensive, but they are worth it. For example if you put a text link on a website for \$50 a month and lots of people click on your ad and buy your Paydotcom product or Clickbank product you will most probably double or triple your initial \$50 payment for the ad. That is the goal. Some ads can cost much more than that, some cost \$150 a month. You have to determine if it is worth the money. If a website is ranked number 1 on Google.com for the search term Home Business then you know that that website is very popular. So even \$150 is a good deal. Some sites only ranked 10th on Google for popular terms like Work at home can also be a good deal. You need to be looking at how well their site is built. Another good tool to see how popular a website is, is to look at the website's page rank on google. To see the website's page rank you will first need to download and install the Google Toolbar, and then enable Page rank.

You also want to place ads on good spots on the website. If your ad is placed at the very bottom of the page then that is not so good. Higher up on the page is better. You can literally do hundreds of searches on Google for popular search terms even if you don't like promoting work at home programs. In Clickbank there are programs of all kinds you can promote.

So there is a limitless amount of work for you to do here. You could literally place thousands of ads on thousands of websites and make tons of money.

Here is a sample ad you can send to the owner of a website:

Hi,

I just visited your website I would like to advertise on your website. Could you please send me pricing for placing a text link on your website for 1 month. Please also tell me where on your homepage my link will go. Please send me the details at my email which is youremailhere.

Thank you

Your name here

If the website owner offers advertising on his site, he will contact you and give you pricing. The longer your ad is on the website the more money you will potentially make. Ad placers usually try to buy ads for long periods of time, say for example 3 or 6 months. That way you can negotiate a better price since you are reserving an ad for a longer time period.

Here are some of the websites we have advertised on in the past. You can email them for rates, sometimes their rates are written on their website. We highly recommend this form of ad placing.

## Part 5. Pay per placement ads.

Pay for placement is another very effective way to place ads, however they can be a little more costly. When you get it right though it can pay off very well. In essence when you sign up for either a **Google Adwords** account or a **Microsoft Ad Network account**, you can then place ads on Google and on Msn.com. You create your ads and then pay 0.05 cents to 0.30 cents per visitor to your ads. The goal with these ad networks is to make more then you spend. It is of course less of a science then the stock market, you just create ads and set a price you are willing to pay per click on your ad. Aside from Msn and Google we also recommend **Yahoo Sponsored Search**. Many of the other smaller ad networks have a lot of click fraud, so we suggest that you only place ads on those 3 we just mentioned.

[Microsoft Ad Network](#) is a very good choice, you can get lots of clicks to your product websites for a very low cost.

### [Click Here to open your Google adwords account](#)

I highly recommend looking at this [tutorial](#) that can help you better understand Google Adwords. You can actually get set up within 15 minutes. It will show you how to target your ads and how to select the best keywords for the companies you're typing ads for. Below we will give you samples of ad text you may use as a guide. Be creative and modify the ad text accordingly if you feel the need to. Make sure you enter in your correct hoplink from Clickbank or Paydotcom when they ask for your website link, so you will in turn get paid for your work.

Placing one ad won't take more than 5 to 15 minutes of your time. First to create your campaign you need to login to your account and then click on Create a new campaign, you then click on Keyword-Targeted. That tells Google that you want to create an ad using keywords.

The screenshot shows the Google AdWords dashboard. At the top is the Google AdWords logo. Below it are navigation tabs for 'Campaign Management', 'Reports', and 'Analytics'. Under 'Campaign Management', there are links for 'Campaign Summary', 'Tools', and 'Conversion Tracking'. A yellow notification box with a lightbulb icon says 'Your ads aren't running. Can we help?' and provides a link to 'Yes, help me out'. Below the notification, a bold instruction reads 'The part circled in red is where you need to click'. Under the heading 'All Campaigns', there is a '+ Create a new campaign' button followed by three links: 'keyword-targeted', 'site-targeted', and a help icon. The 'keyword-targeted' link is circled in red. At the bottom, there is a row of buttons: 'Pause', 'Resume', 'Delete', 'Edit Settings', and 'Show all cam'.

You then name your new campaign, each campaign is an ad, an ad and a campaign are both the same thing. You then name your Ad Group, here we named it Dataentry1. You will be typing 1 ad per Ad Group. You then pick the language of the ad you will be typing, for this you always choose English.

## New Campaign Setup

**Target customers** > Create ad > Choose keywords > Set pricing > Review and save

### Create a campaign and an Ad Group

Name your campaign:  [Example](#)  
A campaign is the top level of account organization for all your ads. [\[?\]](#)

Name your new Ad Group:  [Example](#)  
An Ad Group connects your ad and its related keywords, which you'll create in a few moments. This name is for your use; it won't be seen by customers. [\[?\]](#)

#### Your Account

Keywords	Keywords

### Target customers by language

What language(s) do your customers speak?     
Hold down the *control* or *command* key to select

Next you will pick the country or countries where you want viewers of the ad to come from. For example if you want anyone worldwide to click on your ad, you select All Countries and Territories. Or if you want only people from Canada and the United States to click on your ad, you choose Canada and the United States.

## New Campaign Setup

**Target customers** > Create ad > Choose keywords > Set pricing > Review and save

### Target customers by country or territory

Highlight the countries or territories on the left where you'd like your ad to appear, then click 'Add.' Select as many as you like. Your ads will appear to users anywhere in each location you select.

Next you type your ad in the spaces provided to you. You can use the premade ads on this page further down.

Example short ad:

Destination URL: [\[?\]](#)  http://  Max 1024 characters

[« Back](#) [Reset Ad](#) [Continue »](#)

Your success will mainly be determined by which companies you register with, the ad text you write and keywords you select, and the amount you pay per click. I'm going to give you some samples of ad text to write later on, on this page. Please check the google ad form below. This is basically how your ads are going to be set up.

**Step 2 of 4: Create Ad Groups.**

An **Ad Group** is a set of ads and keywords that work together to advertise a product or service.

Name this Ad Group:   
What will it advertise?

**A: Create ads.**

[Chocolate Factory](#)  
Find the golden ticket and you could visit Willy Wonka's factory!  
[www.itwales.com](#)

Enter text below to see your ad here.

Headline:  Max 25 characters

Description line 1:  Max 35 characters

Description line 2:  Max 35 characters

Display URL: http://  Max 35 characters

Destination URL: http://  Max 1024 characters

For example: If you are typing for a company that promotes a chocolate factory, you may want to type in "chocolate" for the title.

For the headline you may want to type "Chocolate Factory" or "Willy Wonka's Factory" etc..

Description Line 1: Find the golden ticket and you

Description Line 2: could visit Willy Wonka's factory!

Display URL: <http://www.itwales.com>

Destination URL: <http://www.itwales.com>

Important: Make sure your hoplink url is entered in correctly so you will be paid for your work.

Helpful Hints: While typing your ads, make sure you use words that are relevant and make sense for your campaign. When customers do a search on google, these ads will be coming up depending on what type of text content and keywords you input in the forms above. The more closer you target your ads on your particular product you're promoting, the more sales you will generate.

Google adwords will have a very useful keyword generator to find the type of keywords you will need for your campaign. Using this keyword generator could boost your daily income by 50%! You can literally get 100's or even 1000's of keywords instantly. Whenever you type an ad on Google, Google will ask you to put in keywords for that ad, you then choose keywords for your ad. It is always best to choose keywords that are relevant to your ad you are putting on Google. If your ad is about home typing, you could use home typing as a keyword, as well as home typist, or typist job. With the Google [keyword tool](#), finding keywords is easy.

In the example of an ad typed out in Google Adwords above (Chocolate Factory), you can see that typing an ad is not very hard. First you put a headline and then you put a description line and a second description line and then you put the display url which is usually the address of the site you are promoting. You then enter the destination url which is the actual page your ad responders will actually visit. You then choose your keywords with the Google keyword tool. You then specify a daily budget for your ad which can be \$2.00, \$1.00 or \$5.00 or much more depending on your budget.

You then type in the amount you are willing to pay per click (visitor to your ad). And you're done. We suggest you make several ads in your Google Adword account. In fact you should make as many as possible to earn the most money. You can promote the same website or product multiple times in your account.

Just type ads for the same company by changing the wording a little in each ad. In the destination url you should remove the x's from the url and replace them with your Clickbank username.

Example short ad:

[Home Typists Required](#)  
Earn money at home as a home typist.  
No experience required-Join us, aff  
[www.data-entry-jobs.com](http://www.data-entry-jobs.com)

Headline:	<input type="text" value="Home Typists Required"/>	Max 25 characters
Description line 1:	<input type="text" value="Earn money at home as a home typist"/>	Max 35 characters
Description line 2:	<input type="text" value="No experience required-Join us, aff"/>	Max 35 characters
Display URL: <a href="#">[?]</a>	<input type="text" value="http:// www.data-entry-jobs.com"/>	Max 35 characters
Destination URL: <a href="#">[?]</a>	<input type="text" value="http:// [v] xxxxx.gray26 hop.clickbank.net/"/>	Max 1024 characters

So how much would it cost to type ads on pay for placement sites?

We will never charge you anything else to access our members area. You have paid for lifetime access to this site which is updated regularly at no additional charge.

In reality all business types require some sort of investment to operate. In this case it will not be costing you an arm and a leg. Google adwords will charge you a onetime \$10 fee to open an account with them. They also charge a minimum of 5 cents per click for every click thru your ad generates. You can start operating this business using only about \$20-\$100 per month. The amount you could make in return can be much more then that. Experienced ad placers put higher budgets to earn more money. When you set up your campaigns with google you can set a daily limit on how much you would like to spend. This way you will not go over your spending limit.

### Creating Good Ad Text And Keywords

Creating good ad text and keywords is very important! A good way you could get some good ideas is to do a search on [www.google.com](http://www.google.com) . If you are promoting a money making program, type in the words such as make money online, work at home or start your own business etc. Dozens of ads will show on the right side of your screen. These are Google adword ads. You can use these google ads as a guide for the ads you will be typing on Google. You can also feel free to copy the

ad text of those you saw on Google. Those ads you see on google are called Google Adwords and they are the ads you will be typing.

If you type in a search for "make money ideas" Do you see all the sponsored links on the right hand side of the page? These are all people that are typing ads on google adwords! Each and everyday they are getting paid commission to their online accounts! Some make \$100's weekly and some affiliates are making \$1000 to \$5000 weekly or more!

As you can see there are thousands of people doing this business right out of their homes as we speak. Don't worry though there is always plenty of room for more ad typers. You do not need to be a rocket scientist to type these ads at home. These are just everyday ordinary people just like you and I. They signed up as affiliates for Clickbank companies of their choice or with companies like [Affiliatecashpayouts.com](http://Affiliatecashpayouts.com), set up a google adwords account and they are making money typing on google. Get really excited about this because you could be making a fortune using this system.

[Click Here to open your Google adwords account.](#)

Out of all the places you can type your ads the 3 best I have found are [Yahoo Search Marketing](#), Google Adwords, and [Microsoft Ad network](#).

Another important point is that you do not even have to type everyday. Once you have gotten your ads out on google and they are getting good click thru rates.. you will be making good money. Your ads keep running without further work. The more typing you do daily the better, but it is not required for you to type everyday. I would recommend monitoring and maintaining your google adwords account every now and then to see what kind of click thru rates you are getting.

Once your pay per click account with Google is created and you have entered a few ads you will start to see sales. If at first you don't get many sales from your ads, you may want to make your ads catchier. Once that is done and your ads are ok and you have established your budget for your ads. You can sit back and see how your ads are doing. Clickbank ads and Affiliatecashpayouts ads are very effective. With good companies you can expect to see 1 in 20 visitors to your ad turning into a sale. If you pay 5 cents per click, that makes \$1.00 if you get 20 visitors. If you get a sale and make \$44.00 you just made \$43. Not bad at all, I am sure you will agree. That is how this business works. And let me tell you it works well for many people including myself.

Well that's it you are ready to get started. The more ads you type the more money you will make. Remember not to bid too high on your keywords for your ad accounts. Do not bid more than 30 cents per keyword as a rule. That way you will make money. A good general bid price is 15 cents. But you can get visitors for less than that. You can try at 5 cents or 10 cents. You will get visitors at that price too, the more you pay the more visitors you will get fast. But if you type

many google adwords at 7 cents per click let's say, you should get a good amount of visitors to your ads.

If at first you don't succeed you should not give up. Starting with classified ads is a good way to start this home business. Once you are used to classifieds you can then try out these ad networks. Here is a picture showing the sales I made a few years back using Google Adwords. In one month's work I made \$11 355.44.

**Found 317 orders processed in Sep 2005.

## Get paid to take online surveys!

Register for the following survey companies and earn cash or win prizes.

### Getting Started:

Step 1: The first thing you need to do is set up a new email address that you'll use just for the survey sites. You don't want to use your primary email address for this. They will send you a lot of email inviting you to complete surveys or other offers.

I prefer to use a free Yahoo email address myself, because they usually don't mark survey email as spam. But you can use who ever you like, another good choice is [www.gmail.com](http://www.gmail.com)

When applying there may be a waiting list, get on it. If you are told to wait till so and so date, make a note of it and then when that date comes around, apply. Be consistent and the work will come.

### Build Your Reputation

When you get jobs or survey work, do them ON TIME, and the best you can. You want the companies to use you again and again.

This is important: Never, never, go off subject or inject your personal feelings unless specifically asked too.

Also write clearly, and neatly. And don't try and sound too professional. Don't use words you normally would not use in everyday conversations. Once a company finds someone that they like, that person will be placed high on their list.

Now you're ready to start reviewing the survey companies:

## Get paid to go shopping!

Mystery Shoppers are people hired by companies to shop at their stores or restaurants and report back on the quality of the service or other such information. Companies use this information to improve their business. Almost all companies go through Shopping Services to find shoppers. I would suggest signing up with as many as you can if you plan on doing this for a living. There is also now a professional association for Mystery Shoppers. You can find information on getting MSAA CERTIFIED [here](#).

We recommend that you open each link in a new window so you don't lose this page.

Apply to as many companies as you can:
